39 Sponge City

Nanfang Pump Industry Co.,Ltd (CNP),as a subsidiary of Nanfang Zhongjin Environment Co., Ltd, was founded in 1991, and listed on Shenzhen Stock Exchange on December 9,2010 with stock code 300145.

In 2018, CNP's annual output exceeded 800,000 units/set with nearly 3 billion sales revenue, growing at a double-digit rate every year.

As a national enterprise technology center,CNP launched ultra-high efficient,new generation CDM (F) light vertical multistage centrifugal pump in 2017, MEI≥0.7.All light stainless steel pump product series grow stably. Intelligent water supply and drainage equipment technology take lead in industry.Fire pump and diesel engine have obtained UL certification.TD series in-line pump, NIS series end suction pump, NSC split casing pump, WQ sewage pump, metering pump, oil pump and other pump products, can meet various application needs of different fields.

CNP has a complete sales network both in domestic and overseas market ,exporting to over 60 countries and regions,maintaining long-term and strong relationship with our clients.CNP pumps have been widely applied in various fields like water treatment、water supply and drainage、HVAC、industrial application、seawater desalination、energy and power etc.

- I Core value: **Integrity , win-win pursue, self-transcendence**
- II Mission: **Pumping water ,Pumping honor**
- III Vision: **A green water expert**
- IV Operation tenet : **Quality first, Credibility supremacy**
- V Enterprise principle: **Solidarity, deploitation, innovation, effort advance**
- VI Social responsibility: **Dedicated members of public welfare**
- VII Management policy: **Customer first, High quality and efficient, environment friendly**
- VIII Quality promise: **Swift delivery ,good service**
- IX Cooperation value: **Work together with peers ,superior and subordinate**
- X Talent value: **Contribution matters**

» PRODUCT DESCRIPTION

With development of the times and social progress, more and more high and even super-high buildings have risen. In order to better meet the needs of different users, CNP launches Constant Pressure Frequency Conversion water supply equipment, which uses advanced NFC-specific intelligence control technology with variable frequency operation, precise control and pump speed adjustment to keep constant pressure in pipeline, so that the entire water supply system is always in an optimal state of high efficiency and energy saving. Intelligent and fully automatic operation, no need for personnel to be on duty, is an advanced energy-saving equipment in the water supply field.

APPLICATION RANGE «

Water dispatching for water company and water group

Residential area and town pumping stations, etc.

Commercial water supply for business buildings, commercial office buildings, large supermarkets, etc.

Water supply to public places like schools, hospitals, hotels, stadiums, golf courses, etc.

Industrial water for food processing plants, pharmaceutical plants, chemical plants, power plants, etc.

Vegetation water like flower spray, agricultural irrigation, urban greening, etc.

Public transportation water supply like subway stations, railway stations, airports, etc.

» PRODUCT FEATURES

Fully automatic unattended operation

The system uses the latest performance control technology to achieve fully automatic control.

Adjust constant water pressure

The intelligent frequency conversion technology automatically adjusts the running speed and numbers of pump, keeps constant pressure of pipe network, and keeps the entire water supply system in an optimal state of high efficiency and energy saving.

Energy efficient operation

The intelligent control system adopts various frequency conversion control methods, combined with characteristics of the performance curve of pump, automatically optimizes the analysis and adjustment, so that each pump always runs at a high efficiency point, saving energy effectively.

Health and safety

All flow passage components of the equipment are processed in food grade Stainless Steel and are fully compliant with related water health regulations.

Longer service life

The equipment pipeline processed by Cold Water Cutting Anti-oxidation Procedure, hardware produced with automatic welding technology, and low-voltage components of international famous brands, are combined together to ensure longer service life of the equipment.

TECHNICAL FEATURES «

1. Intelligent three-core extreme speed inverter controller

Extreme speed

Independent developed, operating speed can reach microseconds.

High efficient

Deep analysis of each pump, to ensure always operating at a high efficiency point.

Intelligent

Powerful data analysis function, real-time analysis, automatic adjustment to the best operating state, to achieve remote monitoring of PC, mobile phone, IPAD and other terminal devices.

Energy saving

Adopt the three-core extreme speed constant pressure no-negative pressure PID patent control technology, making the energy saving effect is more obvious.

Beautiful appearance

Equipped with an industrial-grade high-resolution color touch screen, the interface is beautiful and easy to operate.

2. Imported Siemens SMART PLC control system

Flexible

Modify program according to special needs at any time, greatly improving the flexibility of the equipment.

Extensible

Expand functions without building peripheral modules, making for lower conversion costs and better compatibility.

Adaptable

Strong non-standard adaptability, customized design for different customer requirements.

(3. Remote monitor

Standard configuration: RS485 remote monitoring interface

Each set of equipment is equipped with reserved RS485 interface, standard MODBUS communication protocol, easy monitoring, providing data support for the coming big data era.

Remote monitor cloud platform

Via comprehensive collection and analysis of various equipment data, and business synergistic processing, the secondary water supply equipment dispatching cloud platform finally achieve unified 24-hour uninterrupted monitoring, configuration, operation management, emergency command, etc.

Multi-platform access

Internet browser (IE kernel, Web Kit kernel, blink kernel), Android phone or tablet, IOS phone or tablet all can run.

Permanent data storage

Data cloud storage can save queries lifetime.

Big data intelligence analysis

Cloud data analysis optimizes equipment operating curves and improves operational efficiency.

Centralized management of smart city

The location of the equipment is precisely positioned, all units are managed together. Equipment running state prediction

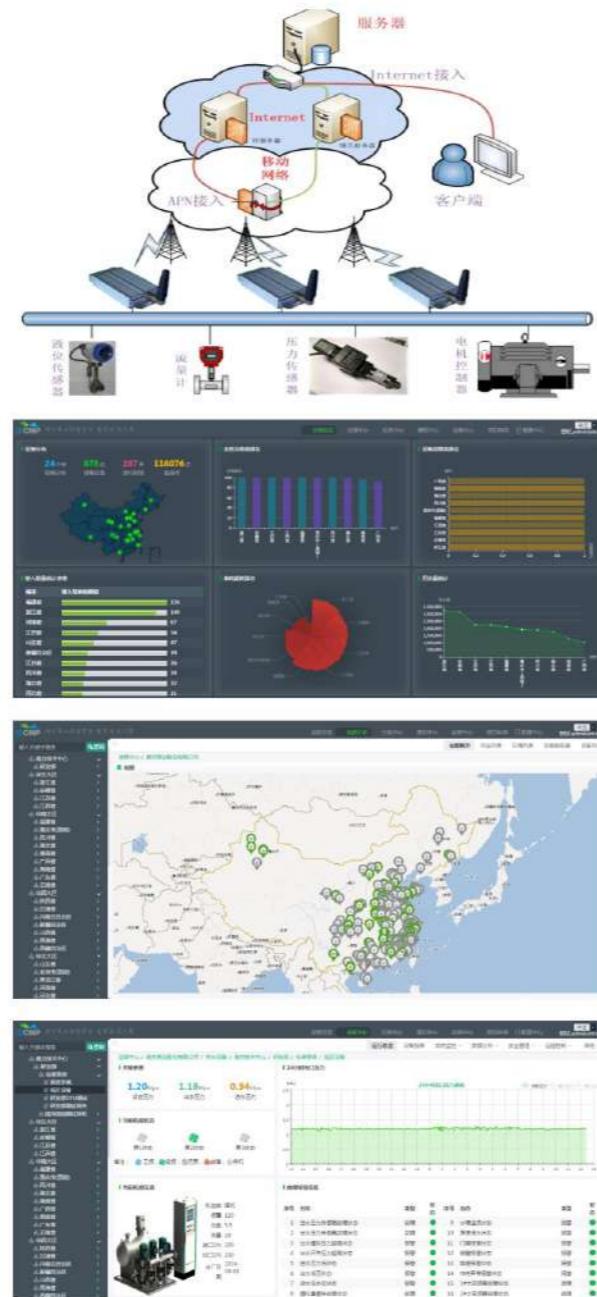

Integrate smart interconnect technology to send maintenance information at regular intervals.

Strong compatibility

Support access to water quality testing equipment from third-party manufacturers.

Safety

Multi-level authority account, partition management, more convenient for the builds and daily management of water company and property company.

(4. High precision meters

▼ The pressure sensor is one of the core components of the equipment. CNP adopts Swiss imported brand products which we cooperate for many years and be sure of the quality. The pressure of the waterproof hammer can be up to 10MPa or more. Wide temperature range is applicable, with the highest +125°C and the lowest -40°C, which can operate safely and reliably in various complicated occasions.

▼ The pressure switch adopts Danish imported brand products as the second guarantee of system pressure. It works together with pressure sensor, when the user pressure is abnormally high pressure, the system operation will cut off in time to ensure user's safety.

▼ The water inlet end of the equipment is equipped with self-designed and developed low water level sensor system. When the inlet is short of water, the system automatically stops running, and the fault alarm prompts to prevent system from idling and damage the equipment.

5. Control cabinet

Industrial-grade dedicated control cabinet, protection class IP30-IP54 is optional, suitable for various working conditions.

Standard control cabinet

It adopts welding combined structure, phosphating primer coating and electrostatic spraying treatment process on external surface, which has high anti-rust performance. The control cabinet color is international gray (RAL7035), with high-grade threshold, the control cabinet is simple and good-looking. The front end of the control cabinet adopts a multi-folded protective wall, which can effectively prevent the entry of water and dust, and is suitable for most working conditions in the room.

High-grade control cabinet

The door panel of the cabinet adopts a curved design, the curved part is embedded with high permeability tempered glass. Elegant curved is matched with large transparent observation window in unique color, enhancing visualization effect of the whole cabinet, which is very humanized and attractive. The cabinet adopts frame structure and advanced double-layer isolation technology to effectively reduce electromagnetic interference. It can be combined together to form a cabinet according to different site needs, which greatly improves uniformity and integrity of the control cabinet. The door panel seal adopts new glue injection technology, the flexibility of the seal strip is greatly improved, the sealing effect is better, and the protection grade can reach IP54, which is suitable for most harsh environments.

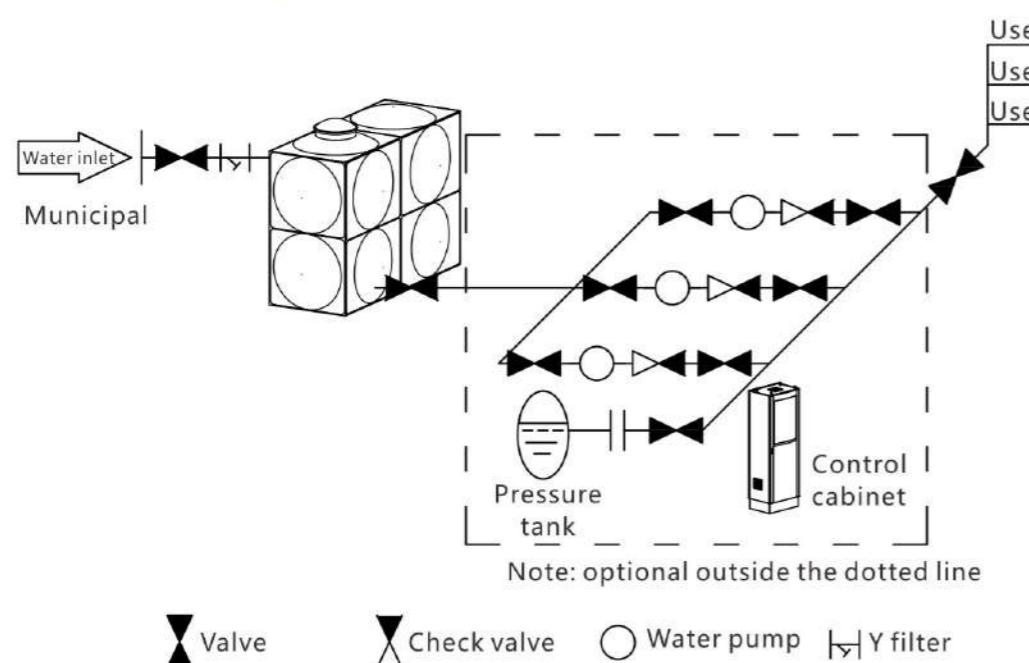

6. Expanded options, precise customization

According to different needs, customers can add accessories such as level gauge, electric energy meter, bypass, flexible joints for inlet and outlet, flow meters, filters, shock absorbers, backflow preventers, sterilizers, water quality testing and purification equipment, etc. Tailored design and development can also be done according to unique needs of our customers.

Device model definition**Example: 3 bench pump set with small flow pump****3 DRL 8 - 6 S 4 - 7**

- Stage number of small flow pump
- Rated flow of small flow pump
- Small flow pump (none means no small flow pump)
- Stage number of main pump
- Rated flow of main pump
- Constant pressure frequency conversion water supply equipment
- Number of pumps (including small flow pumps)

Schematic diagram**• 2DRL Series**
